WIP CONSTRUCTION FUNDING -- ASSESSMENT RESEARCH

ITEM

Review preliminary assessment research for partner purveyors for WIP construction funding
[PROVIDE POLICY GUIDANCE]

BACKGROUND

Your Honorable Board previously reviewed the potential basis of assessment and potential assessment roll for the properties inside NCSD. You then hired the Wallace Group to evaluate the respective basis of assessment and the potential assessment rolls for the properties inside the Woodlands Mutual Water Company (WMWC), Golden State Water Company (GSWC) and Rural Water Company (RWC). Attached is a draft of that report.

As set forth in the attached draft report, the parcels inside WMWC would pay a cost per benefit unit of \$376.13 per year, GSWC at \$106.79 per year, and RWC at 167.60 per year. Each service area has its own chart depicting the basis of assessment. The Service Area maps used for GSWC and RWC have been confirmed with the CA PUC.

For reference, the cost/benefit unit for properties inside NCSD has been estimated at \$228.74.

Copies of this research have been shared with the three purveyor partners. Thus far, neither SWC or RWC have commented. The WMWC has objected to covering the City of Santa Maria's Infrastructure Costs (69% of the annual cost of the water from the City of Santa Maria) in the assessment. District Legal Counsel is reviewing this matter and may have comments to share at the Board Meeting.

Kari Wagner from the Wallace Group is scheduled to present this research at the meeting.

FISCAL IMPACT

This research was paid for by WMWC, GSWC and RWC.

RECOMMENDATION

This item is being presented for information at this time. If the Board has issues or concerns, staff respectfully requests feedback so that the report can be finalized for subsequent adoption.

MEMORANDUM

Date: September 2, 2009

To: Bruce Buel

From: Kari Wagner, P.E.

Subject: DRAFT Assessment District Research for Woodlands Mutual Water Company, Golden State Water Company, and Rural Water Company

The Nipomo Community Services District (District) is currently in the process of designing a water main inter-tie between the City of Santa Maria and the District to bring a supplemental water supply for existing and future water demands. This project will bring an additional 3,000 acre-feet of water for supplemental water supply. The project is currently under design and is estimated to cost \$23.6 million dollars to construct. In addition to the capital costs, the City of Santa Maria will charge the District \$1.725 million, annually, as a buy-in to the City's water system infrastructure for operation and maintenance (O&M).

The capital and O&M cost of the project is being borne by four agencies: Nipomo Community Services District, Golden State Water Company (GSWC), Woodlands Mutual Water Company (WMWC), and Rural Water Company (RWC). Table 1 provides a breakdown of the percentage and cost of each water purveyor's share for the supplemental water supply project (Project).

The District has determined that they will pursue an assessment district to fund their portion of the Project. Therefore, the capital cost will be financed through bonds over a 30 year duration. The exact bond amount is unknown at this time. For budgeting purposes, an interest rate of 8% is being used to determine the annual debt service. Wallace Group has completed a benefit unit analysis and a sensitivity analysis that has determined a range of the cost per benefit unit for all residents in the District service area.

Subsequently, the District has corresponded with the other three water purveyors to discuss funding options. All three water purveyors have agreed to enter into a Joint Powers Agreement with the County of San Luis Obispo to utilize an assessment district as their preferred method of funding. Based on the costs provided above, with an estimated 8% bond rate over 30 years, Table 2 provides a summary of the annual debt service payment for each water purveyor. The annual O&M costs are also included in Table 2 for each water purveyor. Each water purveyor will have the opportunity to pay down their bonding amount with the use of reserves.

The following discusses the evaluation of Woodlands Mutual Water Company, Golden Station Water Company and Rural Water Company's the property development potential, service area boundaries, assessment benefit unit assignment, and estimated benefit unit costs. Although the assessment district will ultimately be one assessment district, the cost per benefit unit will be different for each water purveyor. The cost per benefit unit will be specific to that water purveyors cost and total number of benefit units. In addition, one benefit unit equivalent for one water purveyor will be different than the other water purveyors.

Table 1. Percent Breakdown and Cost

Water Purveyor	Percentage of Share¹ (%)	Water Supply² (acre-ft)	Equivalent Percentage Based on 3,000 acre-ft³ (%)	Capital Cost (\$, Mil)	O&M Costs (\$, Mil)
Nipomo Community Services District	66.68	1,667 + 500	72.24%	17.05	1.25
Woodlands Mutual Water Company	16.66	416.5	13.88%	3.28	0.24
Golden State Water Company	8.33	208.25	6.94%	1.64	0.12
Rural Water Company	8.33	208.25	6.94%	1.64	0.12
Total	100%	2,500 + 500	100%	23.60	1.725

¹ Percentage based on stipulation agreement for 2,500 acre-feet of water.

² The amount of water supply for each purveyor based on a percentage of 2,500 acre-ft. The remaining 500 acre-feet will be used by NCSD.

³ The equivalent percentage for each purveyor based on 3,000 acre-feet of water. This percentage will be used to calculate distributed cost to each water purveyor.

Table 2. Annual Debt Service

Water Purveyor	Capital Cost (P&I) (\$)	O&M Cost (\$)	Total (\$)
Nipomo Community Services District	1,887,390	1,245,418	3,132,808
Woodlands Mutual Water Company	349,923	239,291	589,214
Golden State Water Company	175,510	119,646	295,156
Rural Water Company	175,510	119,646	295,156

DATABASE ANALYSIS

The existing and future development for every parcel was evaluated. Notes and assumptions from the previous NCSD analysis are generally applicable regarding Assessor's information and uses allowed, except as noted below. Thresholds are noted below.

Reference Sources

1. SLO County Land Use Ordinance Title 22
2. South County Planning Area Standards Chapter 22.112
3. Cypress Ridge Specific Plan
4. Woodlands Specific Plan
5. County Tax Assessor's database
6. County GIS parcel aerial database
7. County Tidemark permit tracking system
8. Google Earth aerial information

Assumptions & Thresholds

1. County ordinance states that all parcels within District boundary are, or will be, served by community water and wastewater (Sec. 22.22.080). Note: While required by County zoning, the Nipomo CSD has indicated wastewater service may never be provided to large-lot areas. Therefore, density assumptions were made based on sewer or septic as noted.
2. Woodlands and Cypress Ridge are served by sewer, allowing second units on small lots, but the SP's also limit total density unless a Specific Plan Amendment is approved.
3. All lots outside of Specific Plan areas are assumed to be on septic systems for density purposes, with exceptions as noted. Regardless of zoning and lot size, for property on septic a secondary unit requires 2 acres minimum. Where properties are on community sewer, the secondary unit is allowed on each existing lot over 6,000 square feet, or on any potential lot that could be created by subdivision at the required minimum lot size.
4. RSF lots over 6,000 sf in size have potential for adding a Secondary Dwelling unit, unless they are on septic.
5. Minimum newly created parcel in Rural Lands (RL) is 20 acres (22.22.050).
6. Minimum newly created lot size in Residential Rural (RR) zone is 5 acres (22.22.050).
7. Minimum newly created lot size in Residential Suburban (RS) is 1 acre (22.22.060).
8. Minimum newly created lot size in RSF is 6,000 sf (22.22.070), except where density is dictated by Specific or Area Plan standards as noted, or where limited by wastewater service.

Woodlands Mutual

The Woodlands is allowed a maximum of 1,320 dwelling units, inclusive of second units. Not all primary units are built, but Phase 1 lots are "assumed built". Second units are allowed on lots over 6,000 sf. within the maximum limit of 1,320.

For Woodlands' Commercial Mixed Use (at the Village Center) which are vacant, the maximum floor area allowed under the Specific Plan for all CR lots is provided. The Mixed Use allows up to 80 units per the Specific Plan. Per the Conditional Use

Permit, the Village Center will have 20 units. The assessment district will assume 20 units will be constructed.

The use of the Business Park is authorized to be converted with a Specific Plan Amendment to retail or residential uses. If residential is proposed, it still cannot exceed 1,320 maximum.

For Woodlands CS-zoned lots (all of which are vacant), the Floor Area Ratio (FAR) maximum of 0.35 was used to calculate the maximum development per lot. It turns out that the FAR per each of the 19 lots totals 284,000, considerably less than the overall allowed maximum of 350,000 sf, leaving some potential commercial floor area on the table in Phase II.

The various open space lots are identified within the spreadsheet as follows:
Easement Open Space:

- o Easements providing access to the golf course are "access easements"
- o Easements acting as open space buffers between development are "buffer lots"
- o Buffer easements along the perimeter are identified as "buffer & trail"
- o Pocket park lots are called "park open space"
- o The Butterfly habitat is "habitat open space"

APN 091-500-016 includes all of Phase 2A and 2B.

Golden State Water Company

Golden State Water Company's analysis has the same assumptions and thresholds as NCSD, which were described in Wallace Group's memorandum to the District dated April 15, 2009.

Rural Water Company

Cypress Ridge has sewer service; all parcels outside of Cypress are assumed to be on septic.

Parcels on septic must have a minimum of 1 acre per unit, including second units.

There are some small RSF-zoned and commercial lots at Mesa View and Hwy 1 that are too small to be on individual septic and are assumed to have some form of community septic, which still limits development capacity.

Cypress Ridge interior roads are private and HOA maintained. Some roads may have islands of irrigation, the aerial review could not confirm roadway irrigation because the APN map was misaligned with the physical features.

The resort site has an existing golf club and restaurant. There is an approved VTTM / DP for a new hotel condo resort with restaurant which includes 7 residential lots at Brant and Tattler. These lots are being graded for residential sale, and so will not be part of the resort.

A Lot Line Adjustment is in process to allow these seven lots to be accessed from a common driveway. They will be part of the CR HOA.

The resort will be redesigned to fit the smaller area. The allowed resort uses are:

- o Hotel up to 103 units
- o 14,000 sf footprint for hotel registration & lobby, restaurant (200-seat max), pro shop.

The Cypress Village Center allows for a sports facility (swim & tennis center), a community resource (common building) center, and limited office/retail services. The sports center has yet not been constructed.

Vacant SFR means vacant residential lot.

Verification Method

Nearly all of the parcels for RWC, GSWC, and WMWC were checked on line. Where Assessor's information was used to categorize groups of parcels, some parcels from that group were checked online against the County GIS and permit tracking system as a cross-check.

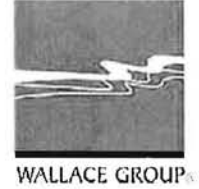

Online Data Verification (OD)

1. Parcels described by Assessor as "vacant", with no assessed improvement value, and no address, were generally accepted as vacant – except Woodlands Phase I lots, which are "assumed built".
2. Residential parcels in single-family zoning described as "Duplex", "SFR w/2nd Living", "SFR w/Sec" etc. were assumed to have legally permitted secondary dwelling units, and were evaluated on that basis. Where two homes were evident in aerial, we verified permits through Tidemark.
3. We assumed that parcels in zones other than OS that are designated as open space by the assessor (and assessed as such) have a deed restriction limiting any development. Some were verified as having an open space parcel "flag" in the County's Tidemark system.
4. Because residential MF density on CR-zoned lots is determined by Conditional Use Permit, the density is discretionary. Secondary units are not allowed on CR-zoned lots. Density is maxed at 26 units/acre, unless affordable bonus density is granted.

We determined that field checking would not, in most cases, reveal much new information about lot development because the lots are large and/ or the questions could not be resolved by field check from the right-of-way. Assumptions provide the basis for evaluations as noted in the comments columns.

BENEFIT UNIT ASSESSMENT

The following provides a summary of the benefit unit assessment for each of the three water purveyors.

Woodlands Mutual Water Company

Woodlands Mutual Water Company owns and operates the water and sewer facilities within the planned community known as the Woodlands. The Woodlands is not fully built out. The Woodlands has an approved tentative map allowing for 1,320 residential units, plus additional commercial facilities. Table 3, located at the end of this section, provides basis of assessment for The Woodlands. Figure 1, located at the end of this section, illustrates the service area and the number of benefit units assigned to each parcel.

Based on basis of assessment, the Woodlands has a total of 1,566.5 benefit units. Table 4 provides a summary of the cost per benefit unit for WMWC. The proposed assessment for each APN is provided in Appendix A at the end of this memorandum.

Table 4. WMWC Cost per Benefit Unit

Annual Debt Service Payment	Number of Benefit Units	Annual Cost per Benefit Unit	Monthly Cost per Benefit Unit
\$589,214	1,566.5	\$376.13	\$31.34

Golden State Water Company

Golden State Water Company is comprised of large residential units on septic systems. Table 5, located at the end of this section, provides the basis of assessment for Golden State Water Company. Figure 2, located at the end of this section, illustrates the service area boundary and the number of benefit units assigned to each parcel.

Based on basis of assessment, GSWC has a total of 2,763.9 benefit units. Table 6 provides a summary of the cost per benefit unit for GSWC. The proposed assessment for each APN is provided in Appendix B at the end of this memorandum.

Table 6. GSWC Cost per Benefit Unit

Annual Debt Service Payment	Number of Benefit Units	Annual Cost per Benefit Unit	Monthly Cost per Benefit Unit
\$295,156	2,763.9	\$106.79	\$8.90

Rural Water Company

Rural Water Company is comprised of large residential units and the planned development known as Cypress Ridge. Table 7, located at the end of this section, provides basis of assessment for RWC. Figure 3, located at the end of this section, illustrates the service area and the number of benefit units assigned to each parcel.

Based on the basis of assessment, RWC has a total of 1,761.0 benefit units. Table 8 provides a summary of the costs per benefit unit for Rural Water Company. The proposed assessment for each APN is provided in Appendix C at the end of this memorandum.

Table 8. RWC Cost per Benefit Unit

Annual Debt Service Payment	Number of Benefit Units	Annual Cost per Benefit Unit	Monthly Cost per Benefit Unit
\$295,156	1,761.0	\$167.60	\$13.97

Table 3. Woodlands Mutual Water Company Basis of Assessment

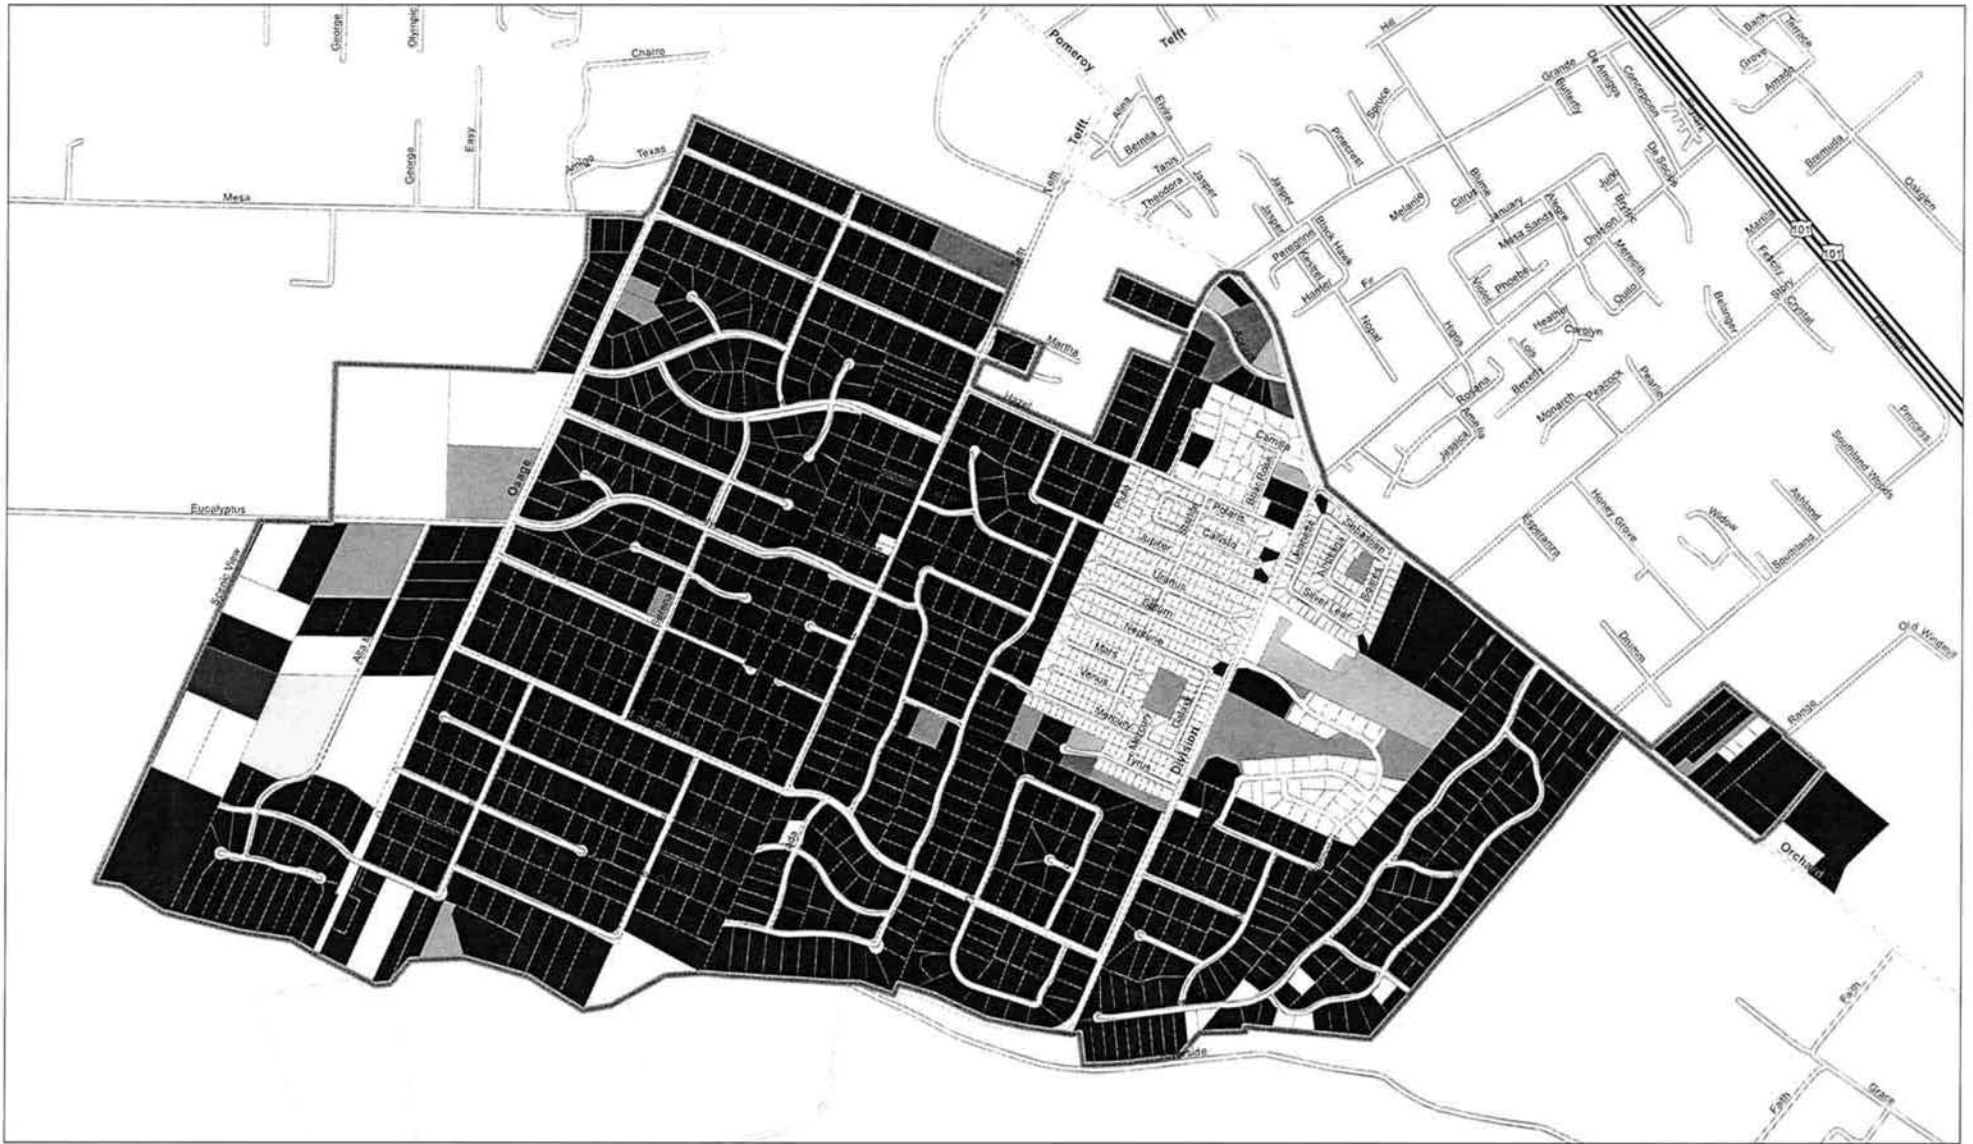

Group	Zoning	Description	Parcel Sizes Included	Recommendations
1	RSF	All residential parcels with one unit	All Parcel Sizes	Basis of Assessment, 1.0 Equivalent Benefit Unit
2	RMF	Multi-family units	<0.1	0.70 benefit units per unit
3	Com	Commercial Services, Office Professional, Commercial Retail	1.0 acre or less	1.50 benefit units
			1.1 to 3.5 acres	3.00 benefit units
			>3.5 acres	6.00 benefit units
