Subject	Southland WWTF Upgrade Project - Design Phase Status Report
From	Michael K. Nunley, PE
Date	March 3, 2010

The Project Team has completed the following items this month:

- AECOM developed and submitted a memorandum for a revised phasing plan based on an updated analysis of historical and current flows and loading to the WWTF (revised draft February 12, 2010).
- Based on this memorandum, Budget Revision Request #2 was submitted on March 1, 2010. The budget revision request describes the work involved to update the phasing plan and capital improvements plan from Facility Master Plan, including task descriptions, deliverables and dates, budget, and the impact to the overall project schedule.

Schedule

The latest Project Schedule is attached.

Budget Status

The Invoice Summary is attached. The Invoice Summary indicates an amount invoiced which is consistent with the work completed to date. Amounts charged to Task Group #2 to date reflect work on construction documents for portions of the Frontage Road Sewer Upgrade. The project cost opinion has not been updated since the January 2009 Master Plan, but the summary table is included and will be updated with the 30% design submittal.

Yours Sincerely

Mide K. Muly

Michael K. Nunley, PE

Notes

- (1) ENR CCI: November 2008 = 8602
- (2) Costs are from the January 2009 Southland WWTF Master Plan.
- (3) Costs are escalated by 4 % per year to anticipated midpioint of construction (2011).
- (4) The Frontage Rd Sewer Upgrade project includes the sewer main from Division St. to the influent pump station. The portion between the street and the influent pump station is currently included in the Southland WWTF Upgrades project scope of work, but may be moved to the Waterline Intertie Project for expedited construction.
- (5) The cost for this portion of Frontage Rd was estimated by prorating the cost opinion for the Frontage Road Sewer Upgrade (based on linear footage) to arrive at the 2008 Construction Cost Opinion. A 4% per year escalation was used to arrive at the 2011 midpoint of construction cost opinion.
- (6) Contingency is estimated at 30% of construction subtotal.
- (7) To be updated by CM Team, assumed to be 30% of construction subtotal minus the engineering fee.
- (8) Costs to be developed with EIR process
- (9) The Frontage Road Sewer Upgrade Project plans are being developed as part of the Waterline Intertie Project effort, but construction will be paid for using separate sewer funds, not supplemental water funds
- (10) Costs based on the 90% plans and specifications for Bid Package #2 of Waterline Intertie Project (October 2009)
