UTILITY BILLING DUPLICATE NOTICE – REQUEST FORM

This agreement is between the NIPOMO COMMUNITY SERVICES DISTRICT and the undersigned PROPERTY OWNER OR AUTHORIZED PROPERTY MANAGEMENT.

I hereby request that a duplicate cycle bill and late notice, if applicable, be mailed to the service address (a mail receptacle at this address is required). If applicable, a door-hanger will be delivered to the service address only, at least forty-eight hours before discontinuance of the water service.

I understand that this request will be in effect until cancelled, in writing, by the property owner or property management representative. I further understand and acknowledge that I, as the property owner or property management representative, am responsible for the payment of all charges for the water and/or sewer and all other charges and fees as billed by Nipomo Community Services District.

I understand that the District does not start and stop water service when tenants move in or out and the duplicate billing coincide with regular meter reading cycles. I also understand and acknowledge that commencement and/or cancellation of this Utility Billing Duplicate Notice must be received by the end of the month prior to the mailing of the next regular billing cycle. I also understand and acknowledge that the charge for this notice, **\$1.50 per billing cycle**, will be included on each statement.

**Alignment of the
State Water
Project Pipeline**

State Water Coastal Branch Pipeline Map

CENTRAL COAST WATER AUTHORITY MISSION
To provide San Luis Obispo and Santa Barbara Counties
with reliable, high quality supplemental water.

photos of vaults housing SWP appurtenances

Reporting a Leak or Suspicious Activity

If you observe a potential leak or observe suspicious activity involving tampering with the SWP Pipeline facilities, we would appreciate a call. **We have a pipeline operator on-call 24 hours per day/7 days per week and they can be reached at 805-245-7054.**

Please know that our staff will be uniformed and driving marked agency vehicles when accessing the pipeline easement for routine operations and maintenance activities.

photos of typical cathodic testing stations and rectifier

Encroachment Permit Program

The SWP Pipeline was constructed within an easement crossing your property. If you have plans to construct something within the easement, an encroachment permit is needed. This is a process of comparing the design for your construction project to the existing locations of the SWP Pipeline facilities. This permit will document the mutual interest and use of the easement area.

For information about our Encroachment Permit Program, please visit our website at www.ccwa.com and click on the "Property Owners" tab. You can also contact us directly by phone at 805-688-2292 for more information.

Central Coast Water Authority

The Central Coast Water Authority (CCWA) is the agency that operates and maintains the State Water Project (SWP) Pipeline in San Luis Obispo and Santa Barbara Counties. Our agency is sending this mailer to you because the SWP Pipeline crosses your property. We wanted to ensure that you had current information about our agency and how to contact us if you had any concerns about the SWP Pipeline.

This brochure has several photographs of typical above ground structures that are associated with the SWP Pipeline, some of which may be located on your property within the CCWA easement. If you have any questions or need more information, please call us at 805-688-2292 or visit us at our website at www.ccwa.com.

Safe Digging Information

Safe digging information is available for anyone free of charge. After calling the USA one-call center, one of our uniformed staff members will arrive to your location to mark the location of the SWP Pipeline and associated subsurface facilities. Representatives of other utility agencies will also mark their facilities. Your USA Ticket will remain valid for 28 calendar days, but can also be extended longer if needed by calling the USA one-call center at 811 or 1-800-227-2600.

WWW.CCWA.COM

The Central Coast Water Authority (CCWA) maintains and operates the Coastal Branch of the State Water Project for San Luis Obispo and Santa Barbara Counties.

For questions regarding Encroachment Permits, contact:

Central Coast Water Authority
255 Industrial Way
Buellton, CA 93427
(805) 688-2292
www.ccwa.com

Before You Dig

Whether your excavation job is large or small, it is important to contact the USA one call center 2 working days to 14 calendar days before you dig. USA North and South have merged into a one call center.

ADDING VALUE TO COMMUNITIES**

**California Special
Districts Association**
Districts Stronger Together

SPECIAL DISTRICTS LEGISLATIVE DAYS

STRENGTH IN NUMBERS:
ADDING VALUE TO COMMUNITIES

Top 5 Reasons Why You Should Attend:

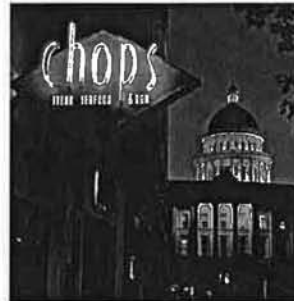

1. Efforts underway in Sacramento could significantly impact special district revenue sources, including **property tax allocations**, voter thresholds for **special taxes** and new **funding opportunities** for “green” projects and programs.
2. Governor Jerry Brown has expressed interest in reforming California’s most important environmental quality law, the **California Environmental Quality Act (CEQA)**, potentially leading to major changes in how districts build infrastructure.
3. Hear directly from California State Controller John Chiang on the latest **financial auditing and compensation reporting** regulations heading your way.
4. Interactive roundtable discussions with our partners and experts will allow you to learn about industry-specific issues—such as implementation of the substantial reforms to **public employee pensions** last year.
5. **Pre-arranged legislative visits** and a hosted reception enable you to build relationships with your state legislators and their Capitol staff.

Legislative
visits in
the Capitol
arranged by
CSDA!

Let your senator and assembly member know about the core services your district provides in their legislative district. Tell them how each dollar invested in your district benefits your shared constituents and adds significant value at the local level!

In order to reserve enough time for scheduling, please register at www.csdanet.net/sdld by April 29 to guarantee your spot in these visits.

Hosted
legislative
reception
sponsored by
SDRMA

Network with legislators and Capitol staff at SDLD’s legislative reception, being held again at Chops, an award-winning restaurant and bar across the street from the Capitol and a favorite amongst the Capitol community.

Location: 1117 11th Street, Sacramento, CA

*SDLD is available for CIPs
for SDRMA members.*

Sponsor opportunity

CSDA Business Affiliates have the opportunity to showcase their products and services as sponsors at SDLD! Space is limited. For more information, please visit www.csdanet.net/sdld. Questions? Contact Professional Development Director Megan Hemming at meganh@csda.net.

For all the latest information, go to our website

Visit the SDLD website for the latest updates at www.csdanet.net/sdld. You will find the most current schedule, speaker bios, a list of our partners, how to find a hotel and more. Most importantly, you can register for SDLD directly on the website!

SPECIAL DISTRICTS LEGISLATIVE DAYS

STRENGTH IN NUMBERS:
ADDING VALUE TO COMMUNITIES

With 39 first-time state legislators and single-party control of every statewide office and two-thirds of each house, California is experiencing an unprecedented legislative session. As California attempts to rebuild its battered budget following years of economic recession, Special Districts Legislative Days (SDLD) 2013 will focus on evolving threats to special district revenue as well as emerging opportunities, including:

- Changes to local revenue measure voter thresholds;
- Protection of existing property taxes and passthrough payments; and
- The distribution of greenhouse gas cap-and-trade auction revenue and Proposition 39 green energy revenue.

A dynamic two-day conference, SDLD provides attendees with the opportunity to hear from and interact with statewide policymakers and legislators, as well as to network and discuss district challenges with peers from other special districts around the state. SDLD includes keynotes from California's highest office-holders, moderated panel discussions with the state's leading experts and issue-specific roundtable conversations covering the most pertinent issues facing each type of special district.

Your engagement is an essential component of CSDA's advocacy efforts in Sacramento to defend special district finances and educate policymakers on the effective service delivery provided by special districts – together there is strength in numbers!

What you can do:

- Register for SDLD today to hear first-hand about the latest revenue proposals directly affecting special districts. You will also have the chance to communicate how new revenue opportunities can strengthen the core services your district provides and share examples of how they would add value to your local communities.
- Join the Host Council and contact your colleagues about the importance of attending SDLD. CSDA will provide you information to pass along. Contact Miryam Barajas at miryamb@cdda.net for more information.
- Visit CSDA's Grassroots Action Center at www.cdda.net/grassroots to read about the most significant proposals impacting special districts and to find out how you can take action now!
- Spread the word! Let other districts know about this exciting conference.

ROUNDTABLE DISCUSSIONS - WEDNESDAY, MAY 15 FROM 9:45-11:45 a.m.

Statewide special district organizations, key local government partners, and industry experts will host roundtables to provide opportunities to network and learn more about key issues within your industry. The following organizations will be hosting roundtables:

- Association of California Healthcare Districts
- Association of California Water Agencies
- California Association of Public Cemeteries
- California Association of Local Agency Formation Commissions
- California Board of Forestry and Fire Protection
- California Public Employees' Retirement System
- California State Association of County Auditors
- Workers' Compensation Action Network

You can choose two roundtables. Two 45-minute sessions will be conducted.

11:45 a.m. - *Closing Remarks:* CSDA President Stanley Caldwell

KEYNOTE SPEAKER

California State Controller John Chiang
As the Chief Fiscal Officer of California, Controller John Chiang oversees the State's nearly \$100 billion annual budget. He also helps administer the state retirement systems CalPERS and CalSTRS, and serves on 81 State boards and commissions, charged with everything from protecting our coastline to overseeing local government financial reporting.

The Controller's monthly financial reports on state revenue gains and losses are especially sought after throughout the budget adoption process. Appropriately, SDLD is held the same week as the California Budget May Revise is anticipated for release by Governor Jerry Brown.

In addition to being responsible for accounting for and controlling disbursement of all state funds, as well as processing all personnel and payroll transactions for public employees, Controller Chiang has key audit oversight for state and local government programs. These audits have identified more than \$3.5 billion in taxpayer dollars that were denied, overpaid, subject to collection, or resulted in revenues, savings and cost avoidance. As state controller, his audit authority includes ensuring that independent audits of local governments comply with professional audit standards, address discrepancies, and inform the public of financial transactions and compensation.

Controller Chiang was first elected in November 2006 to serve as Controller of the State of California, and was re-elected to serve a second term in November 2010.

LOCAL GOVERNMENT COMMITTEE LEADERS

The Honorable Katcho Achadjian (R-San Luis Obispo)
– Chair of the Assembly Local Government Committee, Assembly Member Achadjian represents the 35th Assembly District, which includes the communities of Paso Robles, Pismo Beach, San Luis Obispo, and Santa Maria, among others. Prior to his election to the Legislature, Achadjian served for three terms as an elected member of the San Luis Obispo County Board of Supervisors.

The Honorable Mark Levine (D- San Rafael) – Vice-Chair of the Assembly Local Government Committee, Assembly Member Levine was elected in November 2012 to represent the 10th Assembly District, comprised of the communities of Sausalito, San Rafael, Novato, Petaluma, and Sonoma, among others. A former San Rafael City Councilmember, Levine has held leadership posts throughout his career helping to develop innovative solutions at the local, state, national and international levels.

The Honorable Stephen Knight (R- Palmdale) – Vice-Chair of the Senate Governance and Finance Committee, Senator Knight was elected to the California State Assembly in November 2008 and the State Senate in 2012. Prior to his election to the Assembly, Knight was elected to the Palmdale City Council in 2005. Upon assuming office in the state Legislature, Knight left his 18-year career as a sworn police officer in the Los Angeles Police Department.

SPECIAL DISTRICTS LEGISLATIVE DAYS

STRENGTH IN NUMBERS:
ADDING VALUE TO COMMUNITIES

CSDA WILL ARRANGE LEGISLATIVE VISITS FOR YOU. IN ORDER TO RESERVE ENOUGH TIME FOR SCHEDULING, REGISTER BY APRIL 29 TO GUARANTEE YOUR SPOT IN THESE VISITS.

THE TOWN OF NIPOMO

Nipomo is located in southern San Luis Obispo County on the Central Coast and is located approximately halfway between Los Angeles and San Francisco. The area enjoys a mild climate with beautiful landscapes and convenient access to golfing, nearby beaches, hiking trails and other recreational opportunities.

THE DISTRICT

Nipomo Community Services District operates one water system and two sewer systems: one serving the Town Division and one serving the Blacklake Division. The following services are provided to our residents:

- Water
- Wastewater (sewer)
- Solid Waste franchise
- Street Lighting in the Blacklake Division
- Drainage (limited area)

Nipomo Community Services District

invites you to apply for

Wastewater Supervisor

Filing Deadline:
April 3, 2013
4:30 PM

WASTEWATER SUPERVISOR

Salary

\$65,412 to \$79,512 annually + benefits
Non-Exempt position

About the Position

Under general supervision of the Director of Engineering and Operations, plans, schedules, assigns, and reviews the work of assigned wastewater operations staff within the Engineering and Operations Department. Plans, schedules, assigns, coordinates, monitors, and provides technical input for assigned wastewater system maintenance, construction, and repair projects, and other special programs. Perform a variety of technical tasks relative to the operation, maintenance and repair of District wastewater treatment facilities and wastewater collection systems.

KEY RESPONSIBILITIES

Oversee daily operation and maintenance of .9 MGD and .2 MGD wastewater treatment facilities and 13 sanitary sewer lift stations.

Ensure regulatory compliance of all wastewater facilities and prepare required regulatory reports.

Develop weekly work schedules and priorities.

CURRENT PROJECTS

Coordinate operations planning and commissioning of new Southland WWT facilities.

Provide operations input to Blacklake Sewer Master Plan development.

QUALIFICATIONS

Education and Experience

Equivalent to the completion of the twelfth (12th) grade and four (4) years of progressive field experience in the operation and maintenance of wastewater collection and treatment facilities.

License

Must possess a Grade III Wastewater Treatment Operator Certificate issued by California State Water Resources Control Board

Must possess a valid California Class "C" driver's license and have and maintain a satisfactory driving record and be insurable to operate District vehicles.

BENEFITS

- **Health:** District pays 100% of premiums for employee and dependents.
- **Dental and Vision:** District pays 100% of premiums for employee and dependents.
- **CalPERS Retirement:**
 - New Member: 2% @ 62, 3 year average final compensation formula. Employee pays 13.2%
 - Classic Member: (Tier II) 3% @ 60, 3 year average final compensation formula. Employee pays 8% contribution.
- **Survivor Benefit:** Employee is required to contribute \$2.00 per month.
- **Section 457 Deferred Compensation Plan** is available. District does not contribute on the employee's behalf.
- 10 days of vacation first 5 years and increases to 20 days after 10 years.
- 12 paid holidays per year.
- Sick leave accrued at 8 hours per month

SELECTION

All applicants are required to complete and submit a District employment application, including a current DMV printout, and California Grade 3 Wastewater Operator Certificate, which must be received at the Nipomo Community Services District Office, 148 South Wilson Street, Nipomo, CA 93444, by 4:30 p.m., Wednesday, April 3, 2013. Applications are available at the District's Office or at the District's web site at www.ncsd.ca.gov. The most qualified candidates will be selected to take a written exam and appear before a panel for an oral exam, tentatively scheduled for the week of April 29, 2013.

MINOR MADNESS

St. Patrick School seventh-graders display some of the 136 pairs of jeans they collected to benefit homeless teens on the Central Coast.

St. Patrick students collect jeans for teens

• More than 100 pairs donated to homeless

By Anne Bray

Seventh-graders at St. Patrick School recently extended a helping hand to homeless teens by collecting blue jeans through the "Teens for Jeans" campaign.

The seventh-grade class encouraged fellow St. Patrick students to clean out their closets and donate jeans they no longer wear to help other teens who might not be able to afford to buy denim.

As a result of their effort, 136 pairs of jeans were donated to homeless shelters in the Tri-Coast area, a school spokesman said.

Teens for Jeans encourages students to organize a jeans drive at their school for a chance to win a \$10,000 grant and a school party.

Adopt-A-Teens, a partner in the program, offers a 25-percent discount on a new pair of jeans for each child pair that is donated.

The winning class in the Teens for Jeans contest also receives Adopt-A-Teens hoodies imprinted with the school's name.

Seventh-grade teacher Colleen Santolucito said she saw the campaign as an opportunity to teach her students important lessons.

"By participating in Teens for Jeans, my students were able to learn firsthand the benefits of helping their peers clean for more than 100 pairs of jeans," Santolucito said.

"It is such a rewarding experience for these kids," she added. "My students liked

knowing that the jeans donations they were collecting would stay here in their community and benefit local teens in need."

According to Teens for Jeans, an estimated 1.7 million homeless are under the age of 18 every year. That statistic prompted DoSomething.org to create its annual Teens for Jeans campaign to raise awareness about homeless teens while collecting jeans to benefit them.

Americans have donated more than 2.7 million pairs of jeans since the campaign started in 2007.

St. Patrick Catholic School in Arroyo Grande, which offers classes from preschool through eighth grade, is celebrating its 50th anniversary this year.

For more information, call 489-1210 or visit www.stpatrick.org.

Kids Day will launch springtime in Nipomo

• 15,000 eggs will be up for grabs March 30

By Anne Bray

Nipomo will kick off the springtime season Saturday, March 30, with Kids Day, an event filled with egg hunts, games, inflatables and special activities.

Nipomo Recreation Association, the City Church of the Central Coast and other area churches have teamed up to present the festival from 11 a.m. to 3 p.m. in Nipomo Community Park at West Tefft Street and Pomery Road.

An estimated 3,000 to 4,000 people are expected to attend, a Nipomo Recreation spokeswoman said. Hunts for more than 15,000 candy- and toy-filled Easter eggs will begin around 11 a.m. on the Little League Minor Baseball field, the spokeswoman said.

Children and parents are being advised to arrive early and bring their own baskets for the free hunts that will be divided by age groups.

Parents will be allowed to help little-egg hunters in the 4-to-6- and 7- to 9-year-old groups. But kids will be on their own in hunts for ages 3 to 5, 6 to 8 and 9 to 12 years.

The Easter Bunny is scheduled to make a special visit to the park, the spokeswoman said.

In addition to the egg hunts, activities for the whole family will include games of chance, vendor booths, bounce houses and face painting.

Benjamin Booth makes a mad dash for his share of the 15,000 eggs set out at a past Kids Day egg hunt. Below, Isabella Berthin tries out one of many bounce houses available at the annual event.

The popular cake walk will return, with more than 500 cakes, pies and cookies up for grabs, the spokeswoman said.

Also returning this year are model soccer launches from the "spaceport" at the tennis courts.

A number of singing groups — including the special guest band, the K&Ks — are scheduled to perform throughout the day on the

entertainment stage. The Rotary Club of Nipomo will prepare a barbecue lunch, with all the fixings.

Parking will be free, but heavy rain will cancel the event, the spokeswoman said. Organizers are also asking families to leave their pets at home.

For more information, call Nipomo Recreation at 929-5437 or visit www.nipomorecreation.org.

Children's center gets grant funds

By Anne Bray

The Child Development Resource Center of the Central Coast recently received \$12,880 in grant funding from various charitable organizations on the Central Coast.

Central Coast Parks for Children, an organization that

supports nonprofit organizations serving children with needs in the county, provided \$7,000 for general services and children's therapy.

The organization also donated gifts for the Resource Center's students at Christmas as well as Djs for Ft. San Luis Obispo County Community Foundation

granted \$5,000 to the Resource Center for long-term therapy hours, and the Estero Bay Women's Club donated \$800 raised at a recent yard sale.

The Resource Center provides child development and therapy services to strengthen families with diverse incomes and needs.

March 18-24, 2013

Fix a Leak Week

WaterSense

Save water, save money... it's as easy as 1-2-3

1 Check toilets for silent leaks by putting a few drops of food coloring in the tank and seeing if the color appears in the bowl before you flush. Don't forget to check irrigation systems and spigots, too.

2 Twist and tighten pipe connections. To save even more water without a noticeable difference in flow, twist in a WaterSense labeled faucet aerator or showerhead.

3 Replace the fixture if necessary. Look for the WaterSense label when replacing plumbing fixtures, which signifies the product has been certified to save water and perform well.

For more information and tips, feel free to contact the Nipomo Community Services District at 929-1133 or visit us online at www.ncsd.ca.gov

We're for Water

YOUTH BRIEF

Nanoscale science activities planned

Children can explore the science of incredibly tiny objects and materials during NanoDay from 1 to 3 p.m. Saturday, March 16, at the Exploration Station, 867 Ramona Ave., Grover Beach.

Students from the Cal Poly Materials Engineering Department will be on hand to demonstrate the nanoscale world with interactive, hands-on activities.

Nanoscale refers to materials and objects about a nanometer — one-billionth of a meter — in size, where they have special properties that offer a promise of new technologies.

Exploration Station visitors of all ages can investigate the super thin materials used in solar cell technology, fluorescent tubes that glow brightly and don't get wet even underwater.

Other activities will include using the new nanosensor and measuring oneself in nanometers, an Exploration Station spokeswoman said.

Participation is free with paid admission to the Interactive Science Center at \$2 for children and \$3 for adults.

NanoDay is the largest public outreach effort in nanoscale, informal science education and involves science museums, research centers and universities from Puerto Rico to Alaska, the spokeswoman said.

Fix a Leak Week

Save water, save money!

Check your sprinklers in the spring, summer and fall.
Turn on the valve and look for:

Symptoms of Poor Maintenance:

1

- Erosion
- Water runoff and swampy areas
- Obstructions of spray
- Plants performing poorly
- Water spraying on the street or sidewalk

Problems with Sprinkler Heads and Valves:

2

- Head clogged, leaking, or broken
- Valve leaking
- Plants blocking sprinkler
- Head pushed too far into the ground or spraying in the wrong direction
- Sprinkler spacing not providing even coverage on turf grass

Low Water Pressure:

3

- Popup stem not extending
- Spray not reaching intended watering area
- Doughnut shaped dry areas in turf

High Water Pressure:

4

- Pipe keeps breaking
- Sprinkler nozzles blown off
- Spray is misting or fogging or spray is overshooting desired area

Board Allows Applications for New Water Service

In a follow-up from the February 28th, 2013 press release “Board Initiates Process to Allow Applications for New Water Service,” the District’s Board, during their regular meeting on March 13th at 9AM, unanimously adopted an Ordinance to suspend District policy and allow renewed processing of applications for new District water service.

Processing of applications was previously suspended last spring when funding and the timeline for the supplemental water pipeline project became unsure. With a clear schedule and approved funding plan for bringing in supplemental water from an intertie pipeline with the City of Santa Maria, the Board approved to once again allow applications for new water service. The change becomes effective immediately.

The suspension, versus a full repeal of the previous action, gives the Board flexibility to reestablish the previous policy (of no new water connections) should the circumstances for delivering supplemental water to the area change in the coming months. The District is leading the effort to import water to the area in accordance with a court ordered settlement of a fifteen year case involving all users of the local groundwater basin.

Next Scheduled Board Meeting: Wednesday, March 27, 2013, 9AM, District Board Room 148 South Wilson, Nipomo

For more information or to view the minutes, please contact the Nipomo Community Services District at 929-1133 or visit www.ncsd.ca.gov.

###

Established in 1965 to meet the health and sanitation needs of the local community, Nipomo Community Services is pleased to provide a wide variety of services throughout its district including the provision of water, sewer, and waste management services as well as lighting and drainage in limited areas. The mission of Nipomo Community Services District is to provide its customers with reliable, quality, and cost-effective services now and in the future.

District Awards Grant Funds for Solid Waste Removal to Nipomo Chamber of Commerce

On Wednesday, March 13th, the District's Board held their regular meeting at 9AM and unanimously approved to award Nipomo Chamber of Commerce grant funds in the amount of \$4,010 for solid waste removal in the Nipomo community common areas. These funds will continue a program the District and Chamber initiated last year.

The Nipomo Chamber of Commerce contracts with Achievement House, who employs developmentally delayed adults, to provide the physical labor. The clean-up was initiated last year and was a success. The Board recognized the efforts of Nipomo Chamber of Commerce and Achievement House and approved the grant funds to continue the clean-up work for three months. All agreed these were funds well spent producing multilayered community benefit.

Chamber President, Rudy Stowell, expressed to the Board "Thank you once more for making this possible."

Next Scheduled Board Meeting: Wednesday, March 27, 2013, 9AM, District Board Room 148 South Wilson, Nipomo

For more information or to view the minutes, please contact the Nipomo Community Services District at 929-1133 or visit www.ncsd.ca.gov.

Board Allows Relief to Customers with High Water Bills Caused by Leaks

In a follow-up from the February 28th, 2013 press release “Board Initiates Process to Allow Relief to Customers with High Water Bills Caused by Leaks,” the District’s Board, during their regular meeting on March 13th at 9AM, unanimously adopted an Ordinance to allow relief to customers with high water bills due to a leak.

The Ordinance is effective in 30 days and allows staff to grant a customer relief from high water bills in limited circumstances. Relief could only be granted when requested by the customer in writing, the high bill is shown to be caused by a leak, and the leak is repaired. Additionally, relief can be granted to a customer no more than once every three years.

Current District policy still holds that all water metered to a customer is the customer’s responsibility. When leaks occur on the customer side of the water meter and go undetected, high water use and high water bills can result.

Next Scheduled Board Meeting: Wednesday, March 27, 2013, 9AM, District Board Room 148 South Wilson, Nipomo

NCSD may begin processing water applications

Ordinance could get stalled projects moving

MARCH 10, 2013 12:05 AM • STAFF REPORT

Applications for water service from Nipomo Community Services District could be processed soon if the board of directors approves a proposed ordinance this week.

If approved, the ordinance would allow two pending projects — the Jim O. Miller Park and an assisted-living facility on Mary Avenue — to obtain intent-to-serve letters from the district.

Directors introduced the ordinance at the Feb. 27 meeting after receiving a final committee report that found a pipeline from Santa Maria would be the most feasible means of delivering supplemental water to the Mesa.

The final report affirmed the Supplemental Water Alternatives Evaluation Committee's draft version that prompted NCSD directors to call for construction bids at their Feb. 13 meeting.

Buying a blend of state, Twitchell Reservoir and groundwater from Santa Maria would provide adequate water for five to 10 years, district officials said.

However, the committee also recommended that NCSD work with other purveyors and the county to establish longer-term regional solutions.

"The committee's report appears to confirm a project to construct a waterline between the city of Santa Maria and Nipomo is the most feasible water supply available in the near term and also is a key component of long-term regional solutions that require transfer of supply throughout the greater Santa Maria groundwater basin," said Michael LeBrun, district general manager.

He added the report also recommended changes to the district's water conservation program.

After an assessment to pay for a proposed pipeline failed in a public vote last year, NCSD directors passed an ordinance that halted processing of new water service applications.

Since then, the district has come up with a downsized project that can be funded without any new assessments or taxes.

With a clear schedule for building the revised project, directors agreed to suspend the ordinance that halted the processing of applications.

A suspension, rather than a full repeal, will allow directors to re-establish the previous policy if circumstances alter the pipeline timetable, NCSD officials said.

Directors are scheduled to consider the ordinance for final adoption at their meeting set for 9 a.m. Wednesday in the district office, 148 S. Wilson St. If approved, it will become effective in

Copy of document found at www.NoNewTaxes.com

30 days.

• • •

In other water issues, directors introduced an ordinance that would allow customers to seek relief from high water bills caused by an undetected water leak.

That ordinance is also scheduled for final adoption at Wednesday's meeting.

Under the district's tiered water rates, the cost per unit of water jumps incrementally as water use escalates into higher tiers.

The tiered rates are designed to encourage water conservation but could lead to astronomical bills if a leak on a customer's property goes undetected for a period of time.

Under the proposed ordinance, relief could only be granted when requested by a customer in writing, if the high bill is shown to be caused by a leak and if the leak has been repaired.

Relief could only be granted to a customer once every three years.

Also last week, directors awarded a \$200,000 contract to Sansone Co. Inc. of San Luis Obispo to reconstruct the district's Blacklake Well No. 4.

Sansone submitted the apparent low bid among five received by the district.

Cannon of San Luis Obispo designed the project and will provide construction management under a separate contract.

Atascadero shelter may get legal exemptions, regulation

Nipomo once again taking requests for water service

Published: March 13, 2013

Moratorium had been in place since last June

By Cynthia Lambert — clambert@thetribunenews.com

The Nipomo Community Services District will once again process new applications for water service.

The district had placed a moratorium on water hookups last June after local property owners voted against paying \$26 million to build a water pipeline from Santa Maria.

District officials maintain that additional water is necessary to reduce over-pumping of Nipomo's only source of water, an underground aquifer.

The board voted unanimously on Wednesday to again start processing new applications for water service, according to a news release from the district. The change went into effect immediately.

However, the board voted to suspend — not repeal — its previous action, which gives it "flexibility to re-establish the previous policy (of no new water connections) should the circumstances for delivering supplemental water to the area change in the coming months," according to the district.

The district has put the first phase of a revised pipeline project out to bid and could award a contract in April. The revised project would be built in phases.

The first phase, estimated to cost \$14.1 million, would connect a pipeline to Santa Maria's water system, install it across the Santa Maria River and connect to the community's water system. Two other phases of the project are planned to increase the pipeline's capacity.

LOOKING FORWARD

Making a strong case for desalination

MARCH 15, 2013 12:00 AM • JAMES MURR / LOOKING FORWARD

Recently, the Santa Maria Times noted the Nipomo Community Service District's approval of trenching and hooking up to the Santa Maria water system. NCSD will expand its system over time and agreed to purchase water, beginning with 1,000 acre-feet, eventually expanding to 6,000 acre-feet.

Another recent Times article on a snow survey showing January/February to be the driest on record, described the snow pack at Echo Summit at 57 percent of an average year. On average, only 15 percent of annual rainfall comes after January/February.

Meteorologists state there will be less precipitation, but stronger storms. For semi-arid areas like the Central Coast and further south, this is not good. The state Department of Water Resources notified Central California farmers to expect water delivery at about 25 percent of normal, and Southern California about 40 percent of normal delivery.

With climate change, one can expect snow packs in the High Sierras will be unstable in the future. The Weather Channel discussed at length climate change as big storms hit the plains, Midwest and East this winter. One problem discussed was the dredging of the Mississippi River so barges could continue to navigate. They also discussed how much rain would have to fall to bring back average levels of the Mississippi.

As for Santa Maria, one should get on board with a plan to build a gasification power plant using sewer sludge for methanol. Santa Maria captures methane gas from the landfill to generate electricity for Marian Hospital.

In using gasification, the power could be used to desalinate ocean water when rains fail to bring the needed water. This would cost us money to build but it could be used when the snow packs are too small.

Remember back during the serious drought that ended in the March Miracle in 1993? Santa Barbara constructed a desalination plant during the drought. Santa Barbara's Gibraltar Dam had very low water levels. It was clearly a smart move, but then the rain returned to normal cycles. Unbelievably, the city sold the desalination equipment to the Saudi Arabian government, leaving Santa Barbara in the same vulnerable position.

With rainfall becoming more unstable, it would appear Santa Barbara should have kept the plant idle until the next drought. Independent scientists and meteorologists agree change is happening, and most agree it is not a singular event, but numerous changes occurring around the globe that are happening at a much faster pace than originally thought. They know glaciers in the Andes, Alaska, the Arctic, Antarctic and Greenland are retreating much faster than in prior years.

Copy of document found at www.NoNewWipTax.com

One can pay attention to the weather changing to warmer drier periods with intensely big storms like tornadoes and hurricanes. The major storms that hit this year were predicted as being very intense once the storms formed, like Hurricane Sandy that hit the Northeast.

So far here on the Central Coast, it seems our future will be drier with fewer rain events, but meteorologists will have difficulty predicting any future changes. Once they can get a clear formation pattern on an individual storm they can determine the impact.

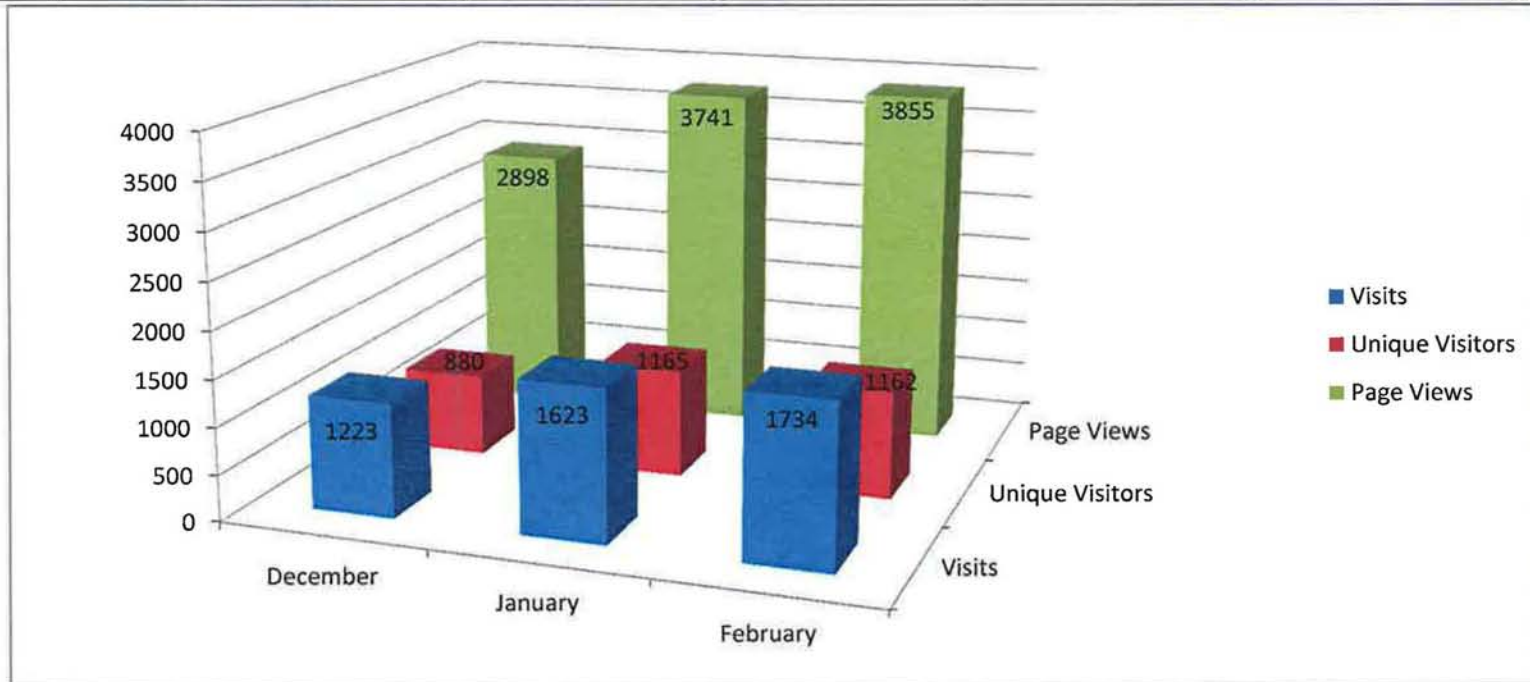

It is in the best interest of the Santa Maria Valley to build a desalination plant to ensure its water supply, as the future is very unpredictable. With so much independent scientific information pointing to climate change, denial and inaction are not options.
