Dear NIPOMO COMM SERV DST :

Test Date 04/28/83

Remarks:

Below is a pumping plant efficiency comparison made on your pump which we recently tested. This report compares the pump's present operating condition to a higher efficiency level which your pump should obtain.

The higher plant efficiency figure selected for comparison is one that we anticipate your pump should be achieving.

We suggest that you consult your pump dealer to determine what can be done to increase the overall pumping plant efficiency.

Please contact us when the necessary repair or adjustment is made so a retest of your pump may be made.
