January 20, 2008

Nipomo Community Services District 148 Wilson Street P.O. Box 326 Nipomo, CA 93444

(805) 929-1133 Phone (805) 929-1932 Fax

Dear Bruce Buel:

SAIC's report RE: Emergency Water Shortage Regulations and Future Groundwater in Storage Dated January 06, 2008 (see attached) has calulations of Groundwater in storage like past SAIC reports. They are for the years 1975 to 2007 with a few missing years (see attached).

I am requesting a copy of all the water levels for each year used to calculate the water in storage for each year.

I am also requesting a copy of the water levels that SAIC had but did not used for each year's calulation.

Thank You

Harold Snyder

Hand Delivered.

1		TECHNICAL MEMORANDUM
2	TO:	Bruce Buel, General Manager
3		Nipomo Community Services District
4	FROM:	Alex Pappas, Joel Degner, Drew Beckwith, Brad Newton, Ph.D., P.G.
5		(SAIC)
6	RE:	Emergency Water Shortage Regulations and Future Groundwater in Storage
7	DATE:	January 06, 2008
8	INTRODUCTION	

INTRODUCTION

This technical memorandum presents an evaluation of Nipomo Community Services District's (NCSD) Draft Ordinance Chapter 3.24 - Emergency Water Shortage Regulations and an estimation of future groundwater in storage above mean sea level (GWS). This work was conducted under the General Consultation Task Order 100-06. This evaluation has evolved with the knowledge gleaned from interim work product prepared over the past months, summarized in five (5) technical memoranda titled: (1) Evaluation of Chapter 3.24 Emergency Water Shortages Regulations, dated June 6, 2007; (2) Alternative Methodology to Determine the Water Conservation Shortages Stages, dated August 28, 2007; (3) Evaluation of Groundwater in Storage for Triggering Conservation Stages, dated October 3, 2007; (4) Predicted Groundwater in Storage from Year 2007 through year 2039, dated November 21, 2007; and (5) Predicted Groundwater in Storage from Year 2007 through Year 2039, dated December 7, 2007.

Annual GWS within the Phase III boundary was computed from groundwater surface elevation measurements from 1975 to 2007, and was estimated for Year 2008 through Year 2039 based on consumptive use of groundwater and a repetition of 1975 to 2007 hydrologic conditions. Year 2007 consumptive use was estimated from a land use classification of the onefoot resolution aerial photograph taken in June 2007. Estimates of future annual GWS were based on four (4) escalation scenarios applied to the Year 2007 annual consumptive use and four (4) alternative hydrologic conditions. The efficacy of the proposed Ordinance was tested against combinations of the four (4) scenarios of water demands and water shortage conditions.

SUMMARY OF FINDINGS

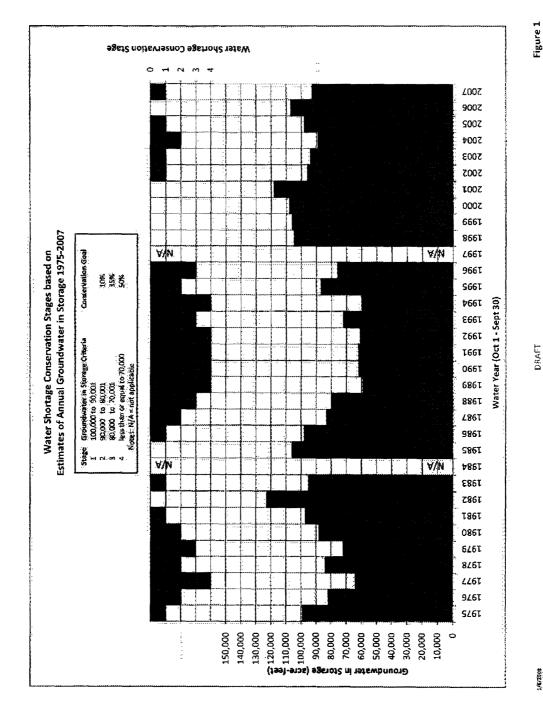

GWS amounts that designate Water Shortage Conservation Stages I - IV were developed on the basis of historical GWS estimates, the change in GWS annually, and the magnitude of uncertainty in the estimates of GWS. The following GWS ranges are recommended to designate Stages I - IV of the Water Shortage Conservation Stages (all GWS values are reported in acrefeet [AF]):

w:\ncsd (9100 9228 5058)\tasks\general consultation - 9100\activities\tnu5-6 water shortage ordinance\delinerable\20080107 energency water shortages

Mr. Harold Snyder P. O. Box 926 Nipomo, CA 93444

SUBJECT: JANUARY 20, 2008 PUBLIC RECORDS REQUEST RE WATER LEVELS

Dear Mr. Snyder,

You have requested a copy of all water levels for each year used to calculate the water in storage for each year summarized in SAIC's 1/06/08 Report. Please be advised that NCSD is not in possession of any such public record.

You have requested a copy of all water levels for each year not used to calculate the water in storage for each year. Please be advised that NCSD is not in possession of any such public record.

If you have any questions, please don't hesitate to call me.

Sincerely,

Bruce Bue
