Michael LeBrun

Following is a copy of the public record request that will be dropped off today. I thought you might like a copy of the recording in question to "confirm" your interpretation.

John

September 6, 2011

Nipomo Community Services District
148 Wilson Street
P.O. Box 326   (805) 929-1133 Phone
Nipomo, CA 93444   (805) 929-1932 Fax

Dear Michael LeBrun:

As you know I made a request on August 23, 2011 for
> "the **"Letter"** that Mr. Harrison disclosed has been received **from "Oceano"** on the issue of "**Sea water intrusion**" at the end of the August 23, 2011 board meeting on the Water Intertie project. Please make a paper copy."

On September 6, 2011 in the response you stated:
> "In responding to Request #3 the District does not confirm your interpretation of Mr. Harrison's statements referenced in your request for public records. **The District has not received from Oceano a letter** on the issue of sea water intrusion."

I went back to the audio tape of the meeting and verify the exact words that Mr Harrison used to describe the letter, he said:

Time>   comment
1:51:20.380 >   Bill Petrik, I would like to clarify the Oceano sea water

intrusion incident.

1:51:27.532 >   Bill Petrik, I think that you really go back to Oceano that has responsibility for that well and ask them.

1:51:34.591 >   Bill Petrik, They will tell you, that was a Maintenance issue and there's nothing in the report that said it's sea water intrusion.

1:51:41.556 >   Harrison, Well thank you for your input however we have a **letter** <u>from the attorney</u> that doesn't agree with you.

1:51:50.381 >   Harrison, the <u>attorney from Oceano</u>, **we have on the letter** <u>from him</u>, that does not agree with what you just said.

I am making a public record request for a copy of the letter or letters that Mr Harrison is referring to.

He uses the words "**<u>letter</u>**" twice and "**<u>the attorney from Oceano we have a letter from him"</u>**. In the context of the comment that was being replied to, it is clear that it has something to do with **<u>sea water intrusion</u>**.

Thank You

Harold Snyder
