Dear Michael LeBrun:

In the "Town Hall" presentation by NCSD on 11/9/11 in the 10th slide it states:

"The experts tell us . . .

We are using twice as much groundwater as is being replaced by rainfall"

I would like to know what the "experts" names are.

If NCSD knows I would also like to know when each expert told "us"

and if it was in writing what the name of the study/document was with the "telling"

If study/documents exist I am making a public record request for a copy of the signature page of the "expert" on those documents

Thank You

Harold Snyder
