

Water pipe already there

Posted: Friday, March 23, 2012 12:00 am

Why doesn't the NCS D tell the people in Nipomo the facts about the pipeline.

Did all the people in Nipomo forget the pipeline brought down from North County years ago? It was ended in Nipomo, in case it was needed in the future. There is the end of it in the street on Thompson in front of the old post office that could/should be tapped into to get us the water they say we need. And it's all paid for.

No need for another pipeline from Santa Maria, costing homeowners thousands each year.
